Hi Tobias.

That's correct. Respondents are to report specific months of school attendance, where any part of a month attended is counted as an entire month. The NLSY79 does not have school attendance by week.

Steve

**Subject:** NLSY79 - Weekly information on school attendance

Dear NLSY support,

My name is Tobias Raabe and I am a research assistant at the Institute for Applied Microeconomics in Bonn.

I am currently working with NLSY79 and I am looking for weekly data on school attendance but I have only found monthly data on enrollment. Is this information also available in the NLSY79 dataset?

Best regards,

Tobias Raabe
